# PRAKHAR MISHRA

Full-Stack Web Development

mprakhar07@gmail.com | +918081480191 | Lucknow,India

**GitHub | Linkedin**

## EDUCATION

**BBD Engineering College**

B.Tech Computer Science

September 2022 - 2026

## SKILLS

| | |
|---|---|
| Programming Languages: | HTML5, CSS3, JavaScript, C++, JAVA |
| Libraries/Frameworks: | Nodejs, ReactJs, Express, NextJs, Prisma, Clerk |
| Tools / Platforms: | Git, Docker, Postman, stripe |
| Databases: | MongoDb, postgresql |

## PROJECTS / OPEN-SOURCE

**weSaas | Link** *Next.js 15, TypeScript, Prisma, Clerk, OpenAI API, Docker, Stripe*

Built a full-stack SaaS platform that dynamically generates context-aware forms using OpenAI's API based on user prompts.

Integrated Clerk for secure authentication and session management, enabling role-based access control and persistent login.

Set up Stripe for handling subscriptions, payments, and customer billing with full webhooks support.

Employed Prisma ORM with a PostgreSQL database for robust schema management and type-safe queries.

Dockerized the entire app for scalable and portable deployment across different environments.

Focused on modular architecture, clean code, and responsive UI with optimized performance and SEO.

**weConnect Job Portal (MERN Stack) | Link** *React Js,Node Js,Express Js,MongoDb*

Built a full-fledged job portal with features like JWT auth, resume uploads, job filtering, user dashboards, and admin control panel.

Designed a responsive and accessible UI using React.js with route-based navigation and reusable form components.

Developed REST APIs in Express.js and secured endpoints with JWT and role-based access controls.

Used MongoDB Atlas for data persistence and integrated real-time notifications for job updates.

Focused on UX design, conditional rendering, and smooth navigation flows to improve engagement.

**weText Real-Time Chat Application (MERN Stack) | Link** *React Js,Node Js,Express Js,MongoDb*

Developed a real-time chat platform enabling one-on-one messaging

Used Socket.io for bi-directional, low-latency communication to handle instant messaging, typing indicators, and user presence.

Implemented JWT-based authentication, protected API routes, and user session handling for secure access.

Designed a clean and mobile-friendly chat UI with React, including message threads, chat lists, and profile sections.

## HONORS & AWARDS

- Specialist at codeforces (1415+ max rating)
- Leetcode rating 1,548
- Coding Ninjas 11th Rank in College
- Coding Ninjas AIR 264 (Tricolour code fest)
